SKILLS

- JavaScript, TypeScript, Node.js
- Next.js, React
- Rust
- MySQL (MariaDB), MongoDB
- Git, Hetzner
- Linux, Docker, VPS Management

EDUCATION

2024 Computer Programming

2026 Doğuş University

ABOUT ME

I am a developer passionate about building tools for communities and optimizing system performance. Experienced in managing self-hosted Linux infrastructure and deployment pipelines. I build fast, secure, and user-centric solutions using Next.js and Rust.

PROFESSIONAL EXPERIENCE

Efmia Construction | [Live Site](#) | [Source Code](#)
Freelance Web Developer

- Developed a modern corporate website for Efmia Construction to showcase completed and ongoing architectural projects.
- Designed a high-performance, mobile-responsive interface using Next.js and Tailwind CSS, featuring lazy-loading for high-resolution project visuals.
- Managed server configuration, domain setup, and deployment processes using Docker on a Linux VPS.

KEY PROJECTS

osu!guessr | [Live Site](#) | [Source Code](#)

2024 - Present Full Stack Web Application

- Scalable gaming platform built with TypeScript and Next.js, reaching over 50,000 unique visitors and 112,000+ game sessions.
- Securely managed database and authentication workflows for 13,000+ registered users utilizing NextAuth & MySQL.

Hanami Bot | [Source Code](#)

2022 - Present High-Performance Discord Application

- Professional Discord bot developed for the osu! community, actively serving over 100+ servers.
- Actively maintained for over 4 years, featuring robust 3rd-party API integrations such as osu! API.
- Engineered with TypeScript focusing on high concurrency, performance, and secure data storage principles.
