

MUHAMMED FATİH FETVACI

FULL-STACK SOFTWARE DEVELOPER

Istanbul, Türkiye | +90 552 122 0727 | me@yorunoken.com
yorunoken.com | github.com/yorunoken | linkedin.com/in/fatih-fetvaci

PROFESSIONAL SUMMARY

Full-stack software developer and Computer Programming student with hands-on experience building and operating production web applications, community tools, and self-hosted Linux infrastructure. Developed TypeScript and Next.js products used by 50,000+ visitors and 13,000+ registered users. Comfortable owning deployment, database, authentication, and third-party API integration work.

PROFESSIONAL EXPERIENCE

Efmia Construction - Freelance Web Developer

Jul 2025 - Jan 2026

efmia.com.tr | github.com/yorunoken/efmia-com-tr

- Designed and delivered a responsive corporate website using Next.js and Tailwind CSS to showcase completed and ongoing construction projects.
- Improved delivery of high-resolution project imagery through responsive image handling and lazy loading.
- Configured the domain, Linux VPS, Docker deployment, and production environment.

SELECTED PROJECTS

osu!guessr - Full-Stack Web Application

2024 - Present

osuguessr.com | github.com/yorunoken/osu-guessr

- Developed and operate a TypeScript and Next.js gaming platform with 50,000+ unique visitors and 112,000+ game sessions.
- Implemented authentication and MySQL-backed account workflows for 13,000+ registered users using NextAuth.
- Manage production deployment, database operations, and Linux VPS infrastructure.

Hanami Bot - Discord Application

2022 - Present

github.com/yorunoken/hanami-bot

- Develop and maintain a TypeScript Discord bot used across 100+ servers for more than four years.
- Integrated the osu! API and other third-party services for community-focused functionality.
- Designed for reliable concurrent command processing, performance, and secure persistent storage.
